Hanison Construction Company Limited Crisis Management Policy Statement

It is the policy of Hanison Construction Company Limited (the Company) to establish and maintain an effective program of Crisis Management (CM) in order to protect the Company from external and internal risks.

Through an established CM program and CM team, we enhance our reaction to the risks and provide capacity to respond should the risks be recognized. The Company will manage a consistent process for the management of its operations across all construction sites, facilitated by task groups which will coordinate emergency responses under the CM program.

We move forward from crises with lessons learned that we must do whatever is necessary to provide a safe and amicable environment for our stakeholders including clients, partners, staff and shareholders by protecting the Company goodwill and brand, on-going and usual business operation and activities from emergencies and unintended disturbances.

It is also the Company policy to meet all legislative requirements in the Hong Kong Special Administrative Region and other serving market.

Stewart Wong
